Groundwater Protection Standard Exceedance Notification

Richmond Power and Light
Whitewater Valley Station
CCR Surface Impoundment
Richmond, Indiana

In accordance with the provisions of EPA's Final Coal Combustion Residual (CCR) Rule in 40 CFR 257.95(g), Richmond Power and Light has determined that statistically significant levels of cobalt, lithium, and molybdenum have been identified during the groundwater assessment program that are in excess of the groundwater protection standards. This notification is therefore being placed in the facility operating record in accordance with 40 CFR 257.105(h)(8).
